## Features

- It has brass material, which is made of copper and zinc composite. It is manufactured by die forcing in moulds and by precision machining on CNC machines.
- FAF branded brass valves made of MS58 quality brass. It has high durability and impact resistance at low temperature. It can be used at water installations.
- The valves are suitable for line assembly in pipeline, the principal aim is to open and close flow in distribution systems.
- Recommended for open/close applications.
- It can be manufactured as FAF4110 Locked ball valve, which provides (Open-Close) locking option
- Leakproof stem.
- Stock piled for quick delivery.

Temperature

- $-10,+110^{\circ} \mathrm{C}$

## Product Description

FAF4100 Brass Ball Valve for gas applications works parallel or vertical position to flow axis by rotating quarter tour ( 90 degrees) between teflon seats via a ball which is big as flow section through control shaft.

## Scope of Application

- Gas
- Pressurized air
- LPG
- Steam
- Heating \& cooling
- Housing \& industrial applications
- Compressed air installations
- Various gases (excluding flammable gases)
