## **SOLENOID CONTROL VALVE**

## **FAF 7520**

#### **PRODUCTION STANDARTS**

#### DN50 → DN300

Operation 0,7 - 16 bar (10 - 240 psi) Pressure Flanged EN1092-2 Connection Threaded ISO (BSP) - ANSI (NPT) Corrosion **Electrostatic Powder Epoxy** Protection

#### Features

- Low energy consumption
- Minimum pressure loss
- Adjustable isolating rate (optional)
- Easy maintenance
- Control in different voltages
- Easy and zero adjustment to demanded pressure
- Does t require maintenance in operation for a long time due to its corrosion resistant components.
- Has a long working life in operation since coating has been made with phosphorization and over-dried epoxy powder paint.
- Performs perfect modulation in variable flows and even too low flow rates close to zero.
- Has a wide range of application with use of different pilot valves.

#### Temperature

• -100 °C

#### Working Principle

#### Product Description

FAF7520 Solenoid Controlled Isolating Valves can be substituted for classic isolating valves. Solenoid enables isolating process by remote control. The control of these valves can be maintained by a control device, intermittent relay, switch, PLC control unit, ete.

#### Adjustment

• Connect the cable of solenoid coil to the panel. Move the threeway globe valve to automatic mode. Drain water to the system.

#### Scope of Application

- Agricultural irrigation
- Supply of water fire extinguishing
- Various applications of industrial systems.
- Oil & gas applications
- Household implementation

#### Note

• For proper use and safety precautions please follow the installation and operating instructions.
